

Product Specification

Design: 'Enigma'

Designer: Paul Brooks

Paul Brooks graduated from Ravensbourne College of Design to go onto the Royal College of Art before joining the design team of Robert Heritage, OBE RDI, in 1983 for a couple of years. After five years in the employ of others, working on diverse products, Paul established his own Design practice in 1988 and has since worked for a host of UK, as well as other European, furniture manufacturers becoming a well established figure in the Design community with many highly successful designs to his credit, including Trillipse, Enigma, Contour and Rhapsody for Senator.

Features

Enigma is a truly universal chair programme with international appeal and stature, designed to provide the very best comfort and support in all the right places for all body sizes. Beautifully finished and with stunning good looks, Enigma conveys high quality, well being and excellent functionality in every detail. The design features a high lift style 5-star base in either a glass filled injection moulded black plastic, or die cast Aluminium and two upholstery styles; standard or slimline.

With three years of development and considerable investment behind it, Enigma readily responds with ease to a multitude of functional applications and status needs. These include options for an adjustable headrest, lumbar support and soft wheeled castors.

It is not just another work chair, but is a milestone for the company in high performance seating design, offering multiple choices to the user that help to promote best practice for a healthy body and superb comfort in a variety of positions. A full range of ergonomic adjustments are provided in this design in accordance with the European Norm. These include an optional negative seat tilt facility of 3 degrees, as needed; a depth adjustable seat with 60mm (2.5") of adjustment as standard; height adjustable backrest (100mm/4"); easy access mechanism tension adjustment from the seated position; and integrated operating instructions to explain all functions. The fixed height arm is width adjustable under the seat while the Multi Function arm provides height, width, depth and rotational adjustment.

Finishes

The injection moulded plastic chair parts are all available in black as standard. The optional cast aluminium 5-star chair base can be polished or painted. Black castors are used as standard with optional soft wheel castors available. Arm pads and the MF arms are also black as standard. The fixed height arm stem is polished aluminium. Upholstery is available in the usual broad range of fabrics and leather.

Marketplace

Enigma has been consistently specified for a wide range of customer projects and environments. It is particularly suited to work intensive environments where excellent ergonomic support is required for long periods. This is a mid to high end product of top quality, comfort and style. It can be specified democratically as an 'every person' for every job chair or as an executive managerial task chair, or even as boardroom or conference room seating. Enigma combines the best materials with highly tooled structurally engineered integrity that will compliment all types of furniture and enhance any interior.
