

# Product Specification

Design: 'Fairway'

Updated – August 2009

# Design

Fairway is a true benching system offering flexibility with no interruption of linear space. It is a dramatic design equipped with a variety of accessories to enhance its practicality and flexibility. It is a classically clean and contemporary solution to the problem facing some of today's working environment requirements.

#### Features

# Applications

The Fairway range has a variety of accessories designed to enhance its practicality and flexibility. These include comprehensive wire management, modesty panels, glazed or fabric covered screens and half screens, and continuous aluminium tool rails.

Clutter free framework and clean lines encourage team working and accessibility and accommodate change without the need to reconfigure entire furniture arrangements. Ideal for offices where space is a premium, it provides the opportunity to accommodate task workers adjacent to each other e.g. Trading Houses, Banks, Call Centres and for hot desking etc.

# **Finishes**

Fairway can be finished in an array of MFC's and veneers – see the full list below, with corresponding codes and complementary metalwork finish.
