## Design: 'Task Three'

### Designer: Senator in-house

Senator in-house design and development team is one from a mixture of design, engineering and production backgrounds. As well as working successfully in developing the ideas of freelance furniture designers, the department's acquired market knowledge has also led to a number of highly successful in-house designs.

### Features:

Task 3 is another classic task and visitor chair collection and consists of many different models. The seat and backrest are deeply contoured to be of maximum comfort and support. This range offers 2 backrest and seat types, optional seat depth adjustment (50mm), and fixed or height adjustable armrests, plus cantilever chairs with or without armrests. There are 2 mechanism options; one having a permanent contact backrest, which either moves with the user or can be locked in a variety of positions; the other is fully synchronised, enabling seat and backrest to be adjusted to the desired position with a fixed ratio of 1:8.1, ensuring correct ergonomic posture and which again moves with the user in 'freefloat' function or can be locked in a variety of positions. Both have an independently operated backrest height adjustment from the seated position and a tension control to adjust the mechanism to the users' weight.

The cantilever meeting and visitor chairs complement the task chairs, utilising the same high backrest and seat as the V355, and V357 task chairs.

### Finishes:

Black injection moulded nylon 5-star base as standard, with silver painted or polished aluminium options. RAL9011 black finish to all plastic parts and cantilever frames as standard, with chrome plated cantilever frame option. Upholstery is available in a wide range of fabrics or leather.

### Marketplace:

Task 3 is a highly versatile task chair range, which is extremely competitively priced and a popular favourite having been specified for a wide range of customer projects and environments for many years. It is particularly suited to work intensive applications where support is required for long periods of sit especially in large busy offices such as call centres, trading houses, banks etc.

### Products available in range

#### V357

V355 Fully synchronised mechanism

No arms

High back

Standard seat width

Permanent contact mechanism

Dimensions:

|         |          |      |      |
|---------|----------|------|------|
| Seat    | 450-560h | 480w | 460d |
| Overall | 1160h    | 600w | 600d |

#### V357A

V355A Fully synchronised mechanism

Fixed ring arms

High back

Standard seat width

Permanent contact mechanism

Dimensions:

|         |          |      |      |
|---------|----------|------|------|
| Seat    | 450-560h | 480w | 460d |
| Overall | 1160h    | 590w | 600d |
| Arms    | 670h     |      |      |

#### V357T

V355T Fully synchronised mechanism

Fixed 'T' arms

High back

Standard seat width

Permanent contact mechanism

Dimensions:

|         |          |      |      |
|---------|----------|------|------|
| Seat    | 450-560h | 480w | 460d |
| Overall | 1160h    | 590w | 600d |
| Arms    | 690h     |      |      |

#### V357HA

V355HA Fully synchronised mechanism

Height adjustable arms

High back

Standard seat width

Permanent contact mechanism

Dimensions:

|         |          |      |      |
|---------|----------|------|------|
| Seat    | 450-560h | 480w | 460d |
| Overall | 1160h    | 620w | 600d |
| Arms    | 660h     |      |      |

#### V356

No arms

High back

Standard seat width

Dimensions:

|         |      |      |      |
|---------|------|------|------|
| Seat    | 465h | 480w | 480d |
| Overall | 970h | 570w | 650d |

#### V356A

Fixed arms

High back

Standard seat width

Dimensions:

|         |      |      |      |
|---------|------|------|------|
| Seat    | 465h | 480w | 480d |
